Bored Audience.	
"Mr. Jaggs never opened his mouth while his wife was entertaining her guests the other night."	
"Oh, yes, he did several times."	
"I didn't hear him. What did he say?"	
"Nothing. He yawned."—Baltimore American.	

The Clove Tree.	
The limbs of the clove tree being very brittle, a peculiar four sided ladder is used in stripping the tree. As fast as the buds are collected they are spread in the sun until they assume a brownish color, when they are put into the storehouse ready for market.	

Sore Eyes	
Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smearing, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Sale at the Eye Free Dispensary or Murine Eye Remedy Co., Chicago.	

AND NOW THEY CALL HIM "YOUNG ZADIG"

NICK ABLEMAN, AFTER A LONG SEARCH, FINDS HIDDEN TREASURE IN THE HILLS

It is neither gold nor silver, platinum nor pearls, but really antimony that has been located by N. C. Ableman, proprietor of the Tonopah club, and his associate, James McKay. And now they call Nick "Young Zadig."

It is a massive formation, traceable for 2000 feet, and it is nearly one hundred feet between the walls. In this formation there are kidneys of the purest of antimony ore, great chunks of it embedded in the matrix.

The discovery was made two miles from Warm Springs on the Hot Creek road. Two men have been put to work on preliminary development and later the force will be increased and a shipment taken out as soon as possible. At the present price of antimony "Gas Pipe" McKay and "Young Zadig" Ableman seem to have a cinch.

CINNABAR AND TUNGSTEN FOUND ABUNDANTLY

(Continued from page 1)

sinking a shaft and is making a test run in the retort. Out of the first 3,500 pounds he got 65 pounds of quicksilver. His shaft is down 25 feet on a strong ledge. Messrs. Pepper & Keough have already produced several flasks of mercury.

There is a mountain of formation at Cinnabar carrying the ores of quicksilver and the new camp is destined to be very active this summer. It is ideally located, so far as wood and water are concerned, while it is easily reached, even at this season, by auto.

The winter has been extremely severe and there is still about two feet of snow there. Messrs. Pepper & Keough used twenty head of horses to break the road so that they could get in their retort, brick and supplies. An auto truck is now supplying the district, running out from Mina.

Capital is already taking considerable interest in the district and a number of propositions have been put up, but the claim owners are not eager to dispose of their holdings in view of the high price of quicksilver and the ease with which it is recovered in the district. It is possible, however, that some of the holdings may soon pass into the hands of concerns that have sufficient capital to work the mines on a large scale and with a greater margin of profit.

G. E. Bosch, Dr. J. C. Cowden, W. W. Booth, Al Thacker, Cap. Belmont and Henry Moore motored out to the district Saturday, returning the following day. They are extremely enthusiastic over the outlook for Cinnabar.

Other Activities
The tungsten properties near Sodaville are attracting almost as much interest as Mina's cinnabar ores. The property eight miles west of town was compelled to close down on account of the deep snow. Before the storm it was a steady and profitable shipper, the output being about twenty tons a day. The tungsten holdings at Sodaville are also closed down pending experimentation as to the process, the ore containing other minerals which make concentration difficult. As soon as the snow disappears the mine west of Sodaville will reopen, but there will be no need for extra labor, the miners that were laid

NO FOOLING WHEN TRAINING'S ON HAND

TONOPAH'S BASKETBALL GIRLS MUST FOREGO CANDY AND OTHER INDIGESTIBLES

What it means in hard work, and sacrifice to train a champion team was explained to a Bonanza representative by Mr. Cross, coach of the girls' team at the high school.

Mr. Cross learned athletics, and how to coach the different branches, in the state normal school at Valley, North Dakota. His first lessons in shooting baskets, booting the pigskin, and cradling the referee came along with his multiplication table. From then until the time he sat up nights digging out the binary roots of a transcendental equation, he was learning good clean athletics, and how to teach them to others.

Mr. Cross makes absolute training, the goal and purpose of all athletic endeavor. His proposition is simple and needs no proof. Athletics are important only to quicken the eye and the muscle, to make the body responsive to the will, and the surest means of bringing about this condition is to make the athlete conform strictly to a code of rules—fair by absolute.

The girl who trains for the high school basketball team, must sacrifice her great joy in all such dainties as candy, pie, French pastry, charlotte-russe, and plum pudding. She must not unduly excite herself with coffee and late hours, and the dance are taboo. Each day she must attend practice, an hour of speedy earnest play, and each morning at 6 o'clock the whole squad meets at the school for a short jaunt of three to four miles in the open. Everything, even beauty sleep, set aside for the one great cause—team work.

Through a constant succession of why's? how's? and when's? Mr. Cross has persisted in his program, solving petty problems that seemed mutiny in a masterful manner, until now, with a champion team in his charge, he needs no answer to the chance why, how or when.

off being given the preference when work starts.

At Redlich on the line of the Tonopah & Goldfield railway some very rich tungsten float has been found, occasionally in large boulders, although the source of the float has not yet been located. The sand itself is so impregnated with particles of tungsten that the owners of the locations, who are local people, are planning to place their ground this season, possibly using water from the Candalaria pipe line.

Everybody in the region seems highly optimistic. Prospectors are outfitting and claim owners are planning active developments. The indications are that this summer the Gillis and other ranges in the vicinity of Sodaville and Mina will be swarming with treasure seekers and the output of precious and useful metals will be the greatest in the history of that region.

Other districts in the vicinity are also showing signs of activity. At Basalt J. Trimble is operating a property that is producing ore going better than \$60 to the ton. It carries gold, silver and lead. Several miners are employed. At Marietta there are several outfits at work and have considerable ore out, which they cannot move until the snow disappears. Douglas is steadily going ahead. The Belleville tailings are being successfully worked on a large scale. In fact, the entire region tributary to Sodaville and Mina is developing into an important mineral empire and the county in which it is situated is indeed well named.

PERSONAL

E. J. HAUG and wife, returned to Schurz this morning.

MR. AND MRS. LAUTERER motored from Millers yesterday afternoon.

MR. AND MRS. BLUNT, accompanied by Miss Johnston, motored from Millers to visit friends here last evening.

MR. AND MRS. HEYDENFELDT were visitors in Tonopah yesterday from Millers.

JOSEPH TOGNONI returned this morning from a short business trip to Reno.

E. E. LAWSON returned this morning from San Francisco, considerably improved in health by his trip.

JUDGE WILLIAM FORMAN returned this morning from Reno, where he was called on law business.

FRANK DUPREY of Millers, who had been visiting in Tonopah for the last week, returned to the mill city this morning.

R. W. CATTERMOLE, chief engineer for the Tonopah & Goldfield railroad, came over from Goldfield today on company business.

FRANK J. CAVANAUGH, who had been confined to his home for several weeks with an attack of the grippe, is able to be out again.

DR. PENNINGTON will leave Tonopah about the 20th for his ranch in Paradise valley. The doctor intends to remain on his property for three or four months or possibly the entire summer.

BEVIS WEIR went to Reno yesterday to visit his mother, Mrs. Fred Weir, and his grandmother, Mrs. George Liles, who is ill in a hospital. Mrs. Weir and son will return in a few days and Mrs. Liles will go to Carson City to visit relatives while she regains her strength.

MRS. ESTELLA MOULD departed on this morning's northbound train for Sioux City, Iowa, where she will visit the parents of her late husband. Later she will journey to her home at Youngstown, Ohio, where she expects to remain for the next few months. A number of friends were at the depot to bid her au revoir.

AMUSEMENTS

BUTLER THEATER

Pauline Frederick, one of the foremost emotional actresses of the American stage, in the photo production of "Sold," the great drama of woman's devotion, will be seen at the Butler this evening. As the wife of the poor artist who poses in the nude for his successful rival in order to aid her husband financially, who detects and misjudges her, Miss Frederick is completely overwhelming. Absolutely true to life, with all of life's little sorrows and gladnesses, hopes and despair, "Sold" becomes more than a drama—it is a slice of life cut out of the world of today and placed on the screen. All the feminine emotions in which the characterization teems, and of which Miss Frederick is so completely mistress, are presented with such force and realism as can come only from historic perfection and well-balanced situations and incidents. Carefully produced, with skillfully timed climax denouement, "Sold" will never be forgotten, both for the intrinsic charm of the subject and the unsurpassable ability of Miss Frederick. The preliminary reel will be Paramount travel pictures.

Tomorrow, a Pathe comedy, and Violet Heming, the youngest leading lady on Broadway, in "The Fighting Chance." Saturday, March 11th the big war picture, "Somewhere in France."

"Somewhere in France"

Germans Taken Captive. Seventy Field Guns Captured. Firing French Mortars. Shrapnel Shells Bursting Over Trenches. Reel No. 1.

BUTLER THEATER

MARCH 11th

CAN YOU WALK?

If you can, come down to the Miners' Exchange hall and we'll teach you how to dance. See "Happy."
